PRODUCT INFORMATION

Dan Stanton
President

As a corporation, Deveco was founded in 1965 to serve as a development and engineering company for the metal finishing industry.

Deveco Corporation is located in Belvidere, Illinois, just a short distance southeast of Rockford, Illinois and northwest of Chicago. This location allows easy access to interstate roadway systems. Our close proximity to Northwest Chicagoland International Airport at Rockford as well as Chicago's O'Hare Airport makes it convenient for national and international travel as well as emergency airfreight shipments.

Over the years, keeping our customers satisfied has meant developing and custom blending new products to specially suit our customer's needs. Deveco Corporation has taken our decades of experiences and continues to answer our customer's demand for new and innovative products. The following information is a brief list of what Deveco has to offer.

Cleaners for all substrates

Alkaline

Acidic

Neutral

Low Temperature

Bio-Based

Black Oxide
